

Patient Centered Medical Home Project

Shah Associate Practice

A vertical image on the left side of the slide showing a two-lane asphalt road with yellow dashed lines, curving into the distance under a bright blue sky with wispy white clouds. The road is flanked by green grass and distant hills.

Why Now? (repairing a broken system)

- Per capita medical expense \$8,290
- \$2.47 trillion annual spending
- 17.6% of GDP going to healthcare
- 48 million uninsured and rising
- 10,000 Baby boomers added to Medicare each day
- 23% of current Medicare patients have 5 or more chronic conditions
- Access to care declining
- Serious concerns about quality by the public
- Early adopters in a progressive movement
- Introduction in 2007 to program (M. Barr, MD)
- ACA leading to ACO
- Carrots and sticks

Early Successes

- Population Management
- Transition Continuity
- Care Managers imbedded
- Enhanced communication and education
- Developing Champions
- Networking with other practices
- CQI projects- DM
- Community Resource connection
- Expanded Access
- Meaningful Use of EMR

Challenges

- Physician Engagement
- Practicing in two systems (Volume and Value)
- Deadlines and data
- Sustainability after the project
- Migrating from static reports to dashboards
- Financing the change
- Cooperation from payers on data
